### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Reed Duthler on November 1, 2010.

It was noted that in claim 53, the number "51" was improperly underlined as this amendment had been made previously. The inclusion of the number "51" is appropriate as written.

The application has been amended as follows:

In the Abstract:

Please delete the entire Abstract of the Invention and insert the following:

--Methods and devices for identification of intrinsic ventricular activity occurring within a ventricular signal. Ventricular signal morphology is analyzed to determine if the signal contains intrinsic ventricular activity while delivering pacing pulses separated by nearly constant time intervals. Furthermore, an extension of a pacing interval is specified based on whether or not the signal contains autonomous intrinsic ventricular activity. In this manner, the pacing interval is only extended when it is likely for autonomous intrinsic ventricular activity to occur.--

In the Specification:

In paragraph [0002], line 2, immediately following "...filed on April 25, 2003," please insert --now abandoned,--

In the claims:

In claim 53, line 1, immediately following "The", please insert --non-transitory--;

In claim 54, line 1, immediately following "The", please insert --non-transitory--;

In claim 55, line 1, immediately following "The", please insert --non-transitory--;

In claim 57, line 1, immediately following "The", please insert --non-transitory--;

In claim 59, line 1, immediately following "The", please insert --non-transitory--;
